The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by CATEYE Co., Ltd. is under license. Other trademarks and trade names are those of their respective owners.

Quick cyclo computer set up via smartphone.

Display ride data and call/email alerts from smartphone to cyclo computer.

Road bike use recommended.

Route data log and the data including altitude with maps can be shared online.

LED backlight illuminates screen when pressed.

Alerts when the remaining battery gets low.

Revolutionary patent pending Integrated Speed Cadence Technology (ISCTec™) sensor. Combines both measurements in a single unit that mounts quickly on virtually any chainstay.

FlexTight™ bracket helps you get rolling fast. Mounts quickly and securely on any handlebar or stem without tools.

The simple and effective ClickTec™ mode button makes toggling through functions as easy as possible. By integrating the toggle switch into the face of the computer itself, CatEye has eliminated the frustration of having to feel or look for the right button while riding. The cantilevered computer body allows the portion of the screen pushed to act as the button itself, creating a sleek, concealed-button appearance and maximizing display space.
